## PROJECTS

**Radiant – Weather Application:** https://stately-lolly-16185e.netlify.app
**Feb. 2024 – Present**
Frontend Developer, Mentor
React | TailwindCSS | Google Maps API | OpenWeather API
- Web-based application that I built to teach front-end libraries and frameworks to college students wanting to learn web development, giving them the opportunity to build a project from scratch with me they can add to their portfolio.

**Lama – Ecommerce Application:** https://tubular-tulumba-85d1d0.netlify.app/
**Dec. 2023 – Jan. 2024**
Fullstack Developer
React | TailwindCSS | Node.js | Express | MongoDB | Redux | JWT
- Web-based application that allows users to filter and sort products by size, color, and price, add products to their shopping cart and wishlist, and purchase the products in their shopping cart by using the stripe checkout api.

**Wavvy – Chat Application:** https://graceful-dodol-b1c40d.netlify.app/
**Dec. 2023 – Jan. 2024**
Fullstack Developer
React | TailwindCSS | Firebase
- Web-based application that allows users to search for other users, search their chats for a specific conversation, send, approve, or deny pending friend requests, and instant message other users texts, images, and even videos.

**Book Nook – Library Application:** https://fluffy-tarsier-1bd9b6.netlify.app/
**Aug. 2023 – Oct. 2023**
Fullstack Developer, Team Leader
React | TailwindCSS | Node.js | SQL
- Web-based application that allows users to rent, checkout, and return books and media, pay late or damaged fees, and allows admins to create, update, or delete users, books, and media and generate revenue reports.

## EXPERIENCE

**NASA**
**Jun. 2024 – Present**
Software Developer Intern
Huntsville, AL
- Developed a web-based application to help optimize and automate the process of creating payload planning overviews for flight operations in the payload and mission operations division at the marshall space flight center.

**CoderKids**
**Feb. 2024 – Present**
